**Test Comments:** *Stands were excellent and growing conditions were favorable for this plot. Ears were nice and girthy and filled to the tip. Most hybrids had the tops blown off of them, but were standing good for the most part. Ears were all facing down and most had weak ear shanks. Ears were falling in the corn head if you tapped the plants. There were a host leaf diseases, but it was difficult to identify them.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different

**Test Comments:** *Stands were excellent and growing conditions were favorable for this plot. Ears were nice and girthy and filled to the tip. Most hybrids had the tops blown off of them, but were standing good for the most part. Ears were all facing down and most had weak ear shanks. Ears were falling in the corn head if you tapped the plants. There were a host leaf diseases, but it was difficult to identify them.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
