Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.030 Prices: GMO = \$3.20; non-GMO = \$3.20

Test Comments: *This was a great location all year long. Seedling emergence was good and corn was nice and even early in the growing season. Plants were not extremely tall, but sported some nice sized ears considering the sandy soil type. Plants showed very little evidence of disease. Ears hung downward at harvest, but maintained a strong ear shank. 80% of the hybrids were filled to the tip and had good girth.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
