Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.030 Prices: GMO = \$3.20; non-GMO = \$3.20

Test Comments: Emergence was excellent at this location. Overall, this was almost an ideal year for this particular plot. There was little to no disease to be found. Corn was standing excellent, even at this late harvest date. Ears were nice and girthy, filled nearly to the tip. Ears were all hanging down, but ear shanks were still nice and tough. Husks were starting to open up which helped with late season drydown.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
