Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.030 Prices: GMO = \$3.20; non-GMO = \$3.20

Test Comments: Emergence was excellent at this location. The plot was planted on a hill that had a gentle slope to the front of the plot.

The early-season test was impacted by excess water, but the full-season test drained well and yield well too. Pollination was good in the full-season, but ears were impacted in the early-season. Stalks were small diameter in general and plants had some common rust on them.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
