Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.030 Prices: GMO = \$3.20; non-GMO = \$3.20

Test Comments: *This is a nice uniform location where almost everything went right this year. The early growing season produced nice even emergence and plant development all the way through pollination. Ears filled to the tip and were nice and girthy. September was dry, but did not seem to hurt grain fill very much. Stalk quality was still excellent at harvest, and I did not see much for foliar disease.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
