**Test Comments:** *Planting conditions were good, which led to an amazing stand and nice uniform corn. Late season conditions would stress this plot from a variety of angles. Plant heights were stunted due to lack of water on this sandy soil. Ears were filled to the tip, but were half the length of most we have seen this year. All ears were upright, and with late season rainfall, some ears had mold inside the husks.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
