**Test Comments:** *Planting conditions were ideal, and final stand values demonstrate that. Corn was nice and uniform around V5-V6 growth stage. Overall, the early growing season was excellent. Pollination was good but rainfall was more limited during grain fill. There were few disease symptoms present at the time of harvest. Lodging scores indicate that almost all the hybrids were still standing well.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
