Test Comments: Rainfall was the 90% of the story at this location. Planting was delayed until the 2nd half of May, but conditions were good the day of planting. Plot emerged nicely and continued nice and uniform all season. This portion of Wisconsin continually received rain-fall all growing season. After Labor Day, it rained nearly every other day, delaying area harvest. Stalk strength was deteriorating at harvest.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
