Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.030 Prices: GMO = \$3.75; non-GMO = \$3.75

Test Comments: *Planting conditions were good at this location due to being on a well drained hill. The same cannot be said for the rest of the county, which had ponds everywhere. Kirk said, "It never stopped raining since planting". Corn had tremendous vegetative growth, up to 12 feet tall. Ears were filled with kernels but their depth was shallow. The plot was essentially disease-free and nice and uniform.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
