Test Comments: This was an awesome plot. Started off good with ideal planting conditions, and some good timely rains early on.

The location looked nice and uniform at the V4 growth stage. Rainfall was never a problem throughout the growing season. Plants maintained some good stalk quality at harvest, with minor diseases present. Ears were filled close to the tip, with a nice deep kernel set.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
