Test Comments: This region was extremely wet this spring which delaying planting. This was one of the final corn plots we planted this year. Growing conditions the rest of the season were pretty good. Plot was nice and uniform all season. Ears had excellent pollination and developed nice deep kernels. Stalk quality at harvest was still decent. Tar spot was present in this area, just like all of southern Wisconsin.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
