Plot looked nice and uniform most of the season, and rainfall was above average for the growing season. Stalk quality was excellent at harvest. It was evident that the wildlife in this area love to eat as well. Tar spot was noted in this entire region starting in August.*

Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
