Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.030 Prices: GMO = \$3.75; non-GMO = \$3.75

Test Comments: *Planting conditions were ideal and plant emergence showed it. Plot was nice and uniform all season long. For a dryland sandy type of soil, the ample amounts of rainfall received throughout the season was excellent for this site. There was small amounts of tar spot present in some areas, but plot was nice and clean otherwise. Plants were still maintaining good stalk quality at harvest time.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
