### TEST COMMENTS:

*We were able to get planted this far north the first day of May and the crop got off to a great start. At the end of May, there was a cold snap the came through central Wisconsin and really slowed corn down for a while. This location was not affected as bad as some. The rest of the growing season saw nice rainfalls and good heat degree units, producing some great yields. Small amounts of Tar Spot and Gray Leaf Spot were still visible.*
