### TEST COMMENTS:

*Emergence at this location was excellent, just like it has been for the last 23 years. The plot received good rainfall and most plants had a medium/tall stature. There was a small amount of Tar Spot noted, but no other diseases to mention. Even though most of the plants had been frosted off at one time there was still green in the base of the stalks, making for some nice standing corn. Ears were big and girthy and filled close to the tip.*
